Fab-Cut Systems Inc.

We are pleased to offer the integrated All-in-One system iCNC® Performance controller, arc starter and servo motors with every Auto-Cut® XT or Ultra-Cut® XT plasma cutting system. This is the most professional system available from Thermal Dynamics.

When matched with Thermal Dynamics innovative Ultra-Cut® with Automatic Gas Control, the iCNC® XT Performance System achieves true integrated control and turns the most precise plasma system into one of the easiest to operate. With special features like Dual Microprocessor Control, iCNC® XT is an affordable upgrade that can be paired with any plasma cutting system for improved cut quality and performance.

We offer prefabricated water or downdraft tables in 4', 5', 6' and 8' wide and up to 50' long as standard options. Custom sizes from 2' wide to 8' wide are also available if required.

Features and Benefits
